WORK SAFETY BOOT

CF11BL

Dual Density site boot, this 4 'D' Ring Boot with scuff cap safety features include a Water resistance upper, Shock absorber heel , Oil resistant sole and is slip resistant. Dual Density PU material is perfect for industries that work in mixed weather environments as the insulation allows the user to remain warm but the air circulation will keep them cool when temperatures rise. The boot has a 200 Joule steel toe cap plus steel midsole protection and because PU is a light material it makes Dual Density site boots one of the go-to safety solutions in the protective footwear world.
